Artificial Intelligence (AI) is a technology that has grabbed a lot of attention in movies, books, products, and in a slew of other places. Often, vendors equate AI with smartness: You buy a smart device to obtain a device with an AI, even though smart devices sometimes are smart only in that they offer connectivity, not AI.

*AI For Dummies Cheat Sheet - dummies*

Artificial intelligence offers numerous opportunities not only for e-commerce, but also for brick-and-mortar retail. These include, for example, digital signage for the automated control of customer traffic in the store taking into account various factors such as weather, age or gender, Smart Mirror (intelligent mirror) for proposing suitable products or AI systems to support the seller in customer advice.
