The electrical energy consumed in a circuit is the loss of electrical potential energy in maintaining current in the circuit. Thus in

File Type PDF Basic Electrical Engineering By V

the figure above, as the charge q ($= It$) moves from point A to B, it loses electric potential energy $= q V = V/ t$ joules. This loss of electric potential energy is converted into heat.

File Type PDF Basic Electrical Engineering By V

Where I is the current through the conductor in units of amperes, V is the voltage measured across the conductor in units of volts, and R is the resistance of the conductor in units of ohms. More specifically, Ohm's law states that the R in this relation is constant, independent of the current.
