Bates-Jensen Wound Assessment Tool: Pictorial Guide ...

I recently read several studies that discussed the Bates-Jensen Wound Assessment Tool (BWAT) scores. 1-4 While reading the study, I realized I was not familiar with this type of wound assessment tool. So what is it? One can use this tool to measure/grade a wound initially and use it at regular intervals to track and evaluate the effectiveness of therapy.

Assessing And Monitoring Wound Progression With The Bates ...

In 2001, the PSST was revised and renamed the Bates-Jensen Wound Assessment Tool to reflect the global use of the tool with wound types beyond pressure ulcers. METHODS Phase 1 involved the selection of digitalized wound photographs for 11 of the BWAT wound characteristics by the researchers. The photographs needed to be of high resolution and good quality for eventual publication and validated by the original BWAT author as being representative of the intended characteristic.

Bates-Jensen Wound Assessment Tool: Pictorial Guide ...

Bates-Jensen Wound Assessment Tool. Similar to the PUSH tool, the BWAT method uses the scoring of several factors to determine the state of a wound. According to the BWAT instructions for use, this tool measures 13 wound components which are independently ranked from one to five. A sub-score of one on any item indicates that the specific factor being measured is non-harmful while a sub-score of five indicates that the factor is extremely necrotic.

Comparing Two Major Tools for Wound Assessment and Healing

• Adapted from the Pressure Sore Status Tool9 by Barbara Bates-Jensen • Evaluates 13 wound characteristics with a numerical rating • Total score ranges from 13 (skin closed) to 65 (profound tissue degeneration) — watch total score to see if wound healing or not • Has evolved to include measuring and predicting wound healing

Skin and Wound Assessment

The On-Time Pressure Ulcer Assessment incorporates elements from the Bates-Jensen Wound Assessment Tool (BWAT) with additional standardized treatment and intervention descriptors. The On-Time Pressure Ulcer Assessment was developed by a multistate multidisciplinary design team that consisted of wound nurses, nurse leaders, and consultants from standalone nursing homes, large nursing home chains, and wound centers.

On-Time Pressure Ulcer Assessment | Agency for Healthcare ...
