Submitting whole bunch of drawing for a project was a tremendous job and draftsmen were the busiest persons on the project at the early stage and final stages of projects because they have to do lot of manual works. But now this task has been revolutionized due to introduction of CAD i.e. Computer Aided Design technology.

Overview. Computer aided engineering primarily uses Computer Aided Design (CAD) software, which are sometimes called CAE tools. CAE tools are being used, for example, to analyse the robustness and performance of components and assemblies. The term encompasses simulation, validation, and optimisation of products and manufacturing tools.
