This revision of the classic textbook in endocrinology will offer all of the advantages found in earlier editions of Hadley's "Endocrinology," including clear explanations, interesting applications, and in-depth coverage of vertebrate hormones. In addition, chapters are now presented in a lecture-friendly format, with headers summarizing each of the major concepts. As in earlier editions, basic principles of molecular, cellular, and integrative endocrinology are presented early, along with an updated guide to current research and methodologies. Following chapters contain discussions of each of the major endocrine systems, supplemented with the most important and interesting new information. Neuroendocrine and reproductive systems are the specialty of the new co-author of this edition, and corresponding chapters have been appropriately increased in coverage. Special features of this new edition include... 1. Expanded explanations of basic concepts 2. Updated information on research methodologies 3. Latest research findings added to chapters on each endocrine system 4. Additional diagrams and figures 5. Printed with second color scheme. 6. New "Think, Analyze, and Discuss" review questions For health professionals, veterinarians, pharmacologists, and anyone in a field where endocrinology is the focus.

Develop your grade 3 students writing skills in each of the six traits Ideas, Organization, Word Choice, Sentence Fluency, Voice, and Conventions using 125 engaging, 10- to 15-minute writing lessons.

Power Electronics is intended to be an introductory text in power electronics, primarily for the undergraduate electrical engineering student. The text is written for some flexibility in the order of the topics. Much of the text includes computer simulation using PSpice as a supplement to analytical circuit solution techniques.

Joel Spring's American Education introduces readers to the historical, political, social, and legal foundations of education and to the profession of teaching in the United States. In his signature straightforward and concise approach to describing complex issues, Spring illuminates events and topics and that are often overlooked or whitewashed, giving students the opportunity to engage in critical thinking about education. In this edition he looks closely at the global context of education in the U.S. Featuring current information and challenging perspectives—with scholarship that is often cited as a primary source, students will come away from this clear, authoritative text informed on the latest topics, issues, and data and with a strong knowledge of the forces shaping of the American educational system. Changes in the 17th Edition include new and updated material and statistics on economic theories related to "skills" education and employability the conflict between a skills approach and cultural diversity political differences regarding education among the Republican, Democratic, Libertarian and Green parties social mobility and equality of opportunity as related to schooling global migration and student diversity in US schools charter schools and home schooling

Fourteen-year-old Roonie loves hip-hop almost as much as she loves her grandmother. She cannot wait to compete in her school's dance competition. But as her grandmother's health deteriorates, Roonie becomes more and more reluctant to visit her in the care home. These feelings of guilt and frustration cause Roonie to mess things up with her hip-hop dance partner and best friend, Kira. But while doing some volunteer hours in the hospital geriatric ward, Roonie meets an active senior recovering from a bad fall. Their shared love of dance and the woman's zest for life help Roonie face her fears, make amends with Kira and reconnect with Gram before it's too late.
