The Metaphysical Club is the winner of
the 2002 Pulitzer Prize for History. A
riveting, original book about the
creation of modern American thought.
The Metaphysical Club was an

informal group that met in Cambridge, Massachusetts, in 1872, to talk about ideas. Its members included Oliver Well Holmes, Jr., future associate justice of the United States Supreme Court; William James, the father of modern American psychology; and Charles Sanders Peirce, logician,

scientist, and the founder of semiotics. The Club was probably in existence for about nine months. No records were kept. The one thing we know that came out of it was an idea -- an idea about ideas. This book is the story of that idea. Holmes, James, and Peirce all believed that ideas are not things

some inner logic of their own but are entirely dependent -- like germs -- on their human carriers and environment. And they thought that the survival of any idea depends not on its immutability but on its adaptability. The Metaphysical Club is written in the spirit of this idea about ideas. It is not a history of
