The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to: ◻ Search for text in a file or across multiple files ◻ Create, update, move, and rename files and folders ◻ Search the Web and download online content ◻ Update and format data in Excel spreadsheets of any size ◻ Split, merge, watermark, and encrypt PDFs ◻ Send email responses and text notifications ◻ Fill out online forms Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in Automate the Boring Stuff with Python, 2nd Edition.

This book constitutes the thoroughly refereed post-proceedings of the 8th International Workshop on Web Services and Formal Methods, WS-FM 2011, held in Clermont-Ferrand, France, in September 2011. The workshop was co-located with the 9th International Conference on Business Process Management, BPM 2011. The 9 full papers presented were carefully reviewed and selected from 14 submissions. They deal with service oriented computing (SOC), cloud computing and formal methods.

This book is for every employee that's required to consolidate hundreds of documents into a large, single document. Users will be able to extract data from hundreds of emails for documenting correspondence in seconds; users will be able to consolidate month-end reports and other business documents in seconds, and users will be able to manually resize, format and apply effects to hundreds of large images simultaneously in under a few seconds. Tasks that currently require days or weeks to complete can now be completed in under a few seconds. I've written each code to specifically eliminate redundancy in three different areas: email consolidation; document consolidation, i.e., Microsoft Word documents, text files, and email files; the last area deals with formatting, resizing and adding effects to hundreds of images in seconds. There's no need for a user to understand the codes in this book, because he or she will simply type the codes exactly as shown in this book, and his or her headaches will disappear.
