Managing Human Resources provides a comprehensive overview of the functions, systems, and responsibilities related to human resources. The authors have two main purposes in writing this book, which they state in the preface: to equip students with the tools and practices needed to be a successful human resource professional, along with an appreciation for the change they can effect, and to present the most current challenges and opportunities that graduating students will face when they enter the work environment. The product recognizes the value of the HR professional in developing and implementing strategy, ultimately supporting the success of their employees as well as the entire organization.

"This first edition is an Introduction to Human Resource Management text for students in Intro HR courses, who do not plan to become HR practitioners. It views the various HR functions through a general manager's lens, rather than an HR specialist's lens, providing a less technical and more applied introduction to the field."--

Steen/Noe Fifth Canadian Edition has been written to make HR more accessible to students, more reflective of their situation, and more about them. Today, every manager is "in HR", and every employee is actively engaged in the process of HRM, regardless of whether they aspire to be a manager or an HR professional. Students will experience HRM every day of their working lives, from how they are perceived by recruiters to completing a performance appraisal, to being promoted or fired. When students ask "What's In It For Me?", the Fifth Canadian Edition will show them just how relevant HRM is to them as people, employees and eventually managers. This easy to read and relevant 11 chapter human resource management text is ideal for a one-semester course. Steen/Noe balances theory with practical application and rich examples that support the need for foundational HRM, thought leadership and applied insight necessary to perform and thrive in organizations today.
