Sealing solutions for enhanced system performance. Seals have a crucial impact on system performance. Life and reliability of what is often considered a simple component can make all the difference to your product and operations. With SKF, you get support for all the key aspects of your sealing system. For the last 110+ years, CR Seals has been setting performance and service life standards for industrial and automotive shaft seals.

So many companies and brands out there in the market, it will be impossible to stand out without a great name. Just imagine, there are already more than 150,000 companies operating in a small country like Singapore. How will your brand stand out if it doesn't have a great name? Finding a great name is also no longer easy because of the proliferation of companies and brands in our society. Chances are, the name you think of has already been registered and trademarked by someone else. So, what do you do? The 10 Rules Of Naming will show you how to create a powerful brand name in a simple, straightforward and jargon-free manner. Besides explaining the 10 rules of naming in detail, the book also covers the pitfalls of naming to avoid, binding everything together through vivid examples of how companies with great names went about creating those names.

The definitive guide to the international fluid sealing industry to help you make the right business decisions. • Will help you to keep track of the major issues affecting the market. • Will enable you to identify new business opportunities. • Includes Market forecasts, commentary and analysis sup.orted by primary research Completely revised and updated, the 3rd edition of Profile of the International Fluid Sealing Industry - Market Prospects to 2008 reviews the markets, technological trends and major manufacturers of fluid seals on a global basis. We have drawn on the expertise from our existing portfolio, Sealing Technology newsletter and World Pumps magazine to bring you vital information, analyses, forecasts that cannot be found anywhere else. The study deals with items and materials used, very largely, in the mechanical engineering sector, to effect hermetic closures or the separation of fluids. It therefore covers gaskets and packings, O-rings and mechanical and bellows seals. Profile of the International Fluid Sealing Industry covers the structure of the industry, highlighting developments, identifying future trends, and looking at recent mergers and acquisitions in the sector. Market estimates and forecasts to 2008, by region and seal type, are presented along with an analysis of the main end-user markets for fluid seals, as well as a technology overview. Forty leading international fluid sealing manufacturers are profiled. A directory of seal manufacturing companies is also included. For a PDF version of the report please call Steve Kimber on +44 (0) 1865 843666 for price details.

Covering New York, American & regional stock exchanges & international companies.

This report surveys the main types of seal, static and dynamic as well as those with more specific applications such as pneumatic and diaphragm seals. It then goes on to look at seal manufacture and the range of polymeric materials available for use in seal design from natural rubber and EPM to fluorosilicone rubbers and PTFE, providing data on their maximum and minimum usage temperatures. An additional indexed section containing several hundred abstracts from the Rapra Polymer Library database provides useful references for further reading.
