Isuzu Canal Boat Engine Spares – Engines Plus

The existing alternator charging circuit, consisting of the orange & red 10GA wires, runs as far as 25+ feet on some boats before it gets to the battery banks. On most of these panels the entire current of the alternator runs through upwards of 25 of 10GA wire and two ridiculously pathetic trailer type connectors, for this type of load. The undersized wire and trailer connectors trying to pass 45A+ creates a large amount of resistance as these boats age.
