Type of Journal: For college-level term papers,
information should be obtained mostly from scholarly
journals. Scholarly Journals contain articles describing
high quality research that has been reviewed by
experts in the field prior to publication. Trade
magazines may be useful for topics in business or
where economic data is needed.

...
An article evaluation or reaction paper is a kind of academic writing that trains you to read more effectively. First, you have to completely understand the article you are evaluating. This means reading it more than once. Second, you have to be able to form your own conclusions and opinions about the author's statements.

□ A supplementary guide for students who are learning how to evaluate reports of empirical research published in academic journals. □ Your students will learn the practical aspects of evaluating research, not just how to apply a laundry list of technical terms from their textbooks. □ Each chapter is organized around evaluation questions. For each question, there is a concise explanation of how to apply it in the evaluation of research reports. □ Numerous examples from journals in the social and behavioral sciences illustrate the application of the evaluation questions. Students see actual examples of strong and weak features of published reports. □ Commonsense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class. □ The structure of this book enables students to work with confidence while evaluating articles for homework. □ Avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even though it has serious methodological flaws. Students learn when and why certain types of flaws may be tolerated. They learn why evaluation should not be performed mechanically. □ This book

received very high student evaluations when field-tested with students just beginning their study of research methods. □ Contains more than 60 new examples from recently published research. In addition, minor changes have been made throughout for consistency with the latest edition of the Publication Manual of the American Psychological Association.

□ The 39 research articles in this collection illustrate a wide variety of models for both quantitative and qualitative nursing research. □ The lines in each article are sequentially numbered, which facilitates classroom discussions by allowing professors and students to pinpoint specific parts of an article. □ The articles have been carefully selected for use with students who are just beginning their study of research methods. The difficulty level will challenge but not overwhelm. □ Factual Questions at the end of each article draw students' attention to methodologically important points. □ Questions for Discussion request students' opinions on unique aspects of each article. □ Helps instructors avoid copyright infringement problems. The publisher has paid fees to the copyright holders for permission to include the research articles in this book. □ New to this edition: A copy of our Bonus Articles for A Cross Section of Nursing Research booklet is included free of charge. □ The research articles are classified under these major headings: □ nonexperimental quantitative research □ true experimental research □ quasi-experimental research □ pre-experimental research □ qualitative research □ combined qualitative and quantitative research □ test reliability and validity

research □ meta analysis. The articles have been drawn from a wide variety of journals such as:

- Behavior Modification
- Cancer Nursing
- Computers in Nursing
- Computers, Informatics, Nursing
- Health Education & Behavior
- Issues in Mental Health Nursing
- Journal for Nurses in Staff Development
- Journal of Community Health Nursing
- Journal of Gerontological Nursing
- Journal of Nursing Care Quality
- Journal of Pediatric Nursing
- Journal of Research in Nursing
- Journal of the Society of Pediatric Nurses
- Nurse Educator
- Nursing Research
- Psychological Reports
- Public Health Nursing
- Rehabilitation Nursing
- Research in Nursing & Health
- The Journal of Nursing Administration
- Western Journal of Nursing Research

Evaluating Research in Academic Journals is a guide for students who are learning how to evaluate reports of empirical research published in academic journals. It breaks down the process of evaluating a journal article into easy-to-understand steps, and emphasizes the practical aspects of evaluating research – not just how to apply a list of technical terms from textbooks. The book avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even when it has serious methodological flaws. Students learn when and why certain types of flaws may be tolerated, and why evaluation should not be performed mechanically. Each chapter is organized around evaluation questions. For each question, there is a concise explanation of how to apply it in the evaluation of research reports. Numerous examples from journals in the social and behavioral sciences illustrate the

application of the evaluation questions, and demonstrate actual examples of strong and weak features of published reports. Common-sense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class. New to this edition

New chapters on: evaluating mixed methods research evaluating systematic reviews and meta-analyses program evaluation research Updated chapters and appendices that provide more comprehensive information and recent examples Full new online resources: test bank questions and PowerPoint slides for instructors, and self-test chapter quizzes, further readings and additional journal examples for students.

□ This collection of research articles emphasizes topics of interest to classroom teachers. □ The 38 research articles illustrate: □survey research □quantitative content analysis □correlational research □true experimental research □quasi-experimental research □pre-experimental research □single-subject research/behavior analysis □causal-comparative research □program evaluation □qualitative research □combined qualitative/quantitative research □meta-analysis □ The lines in each article are numbered sequentially, making it easy to refer to specific parts of the article during classroom discussions. □ The availability of a single source of research articles is convenient and helps you avoid copyright infringement problems. □ Factual Questions at the end of each article allow students to check their comprehension. □ Questions for discussion stimulate classroom discussions of research methods. □ After

Get Free Journal Article Evaluation

answering the questions, students rate the quality of each article using 13 basic criteria. More detailed criteria in the Appendix may also be applied. □ Ideal for courses in which the primary goal is to learn how to evaluate research. □ Twenty-one different journals are represented in the 38 articles in this collection. Students see the diversity of educational research since the journals vary in their standards for publication. □ New to this edition: Thirteen new articles keep this popular research reader up-to-date.

Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions, which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011.

This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system. Focusing on various aspects of the development and application of indicators derived from data on scholarly publications, patents and electronic communications, the individual chapters, written by leading experts, discuss theoretical and methodological issues, illustrate applications,

Get Free Journal Article Evaluation

highlight their policy context and relevance, and point to future research directions. A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources, presenting both traditional and advanced approaches. It addresses the main bibliographic metrics and indexes, such as the journal impact factor and the h-index, as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society. It also presents and critically discusses various national research evaluation systems. Complementing the sections reflecting on the science system, the technology section includes multiple chapters that explain different aspects of patent statistics, patent classification and database search methods to retrieve patent-related information. In addition, it examines the relevance of trademarks and standards as additional technological indicators. The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners, scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance.

□ This new edition gives students valuable practice in reading and evaluating research. All major methods of research are illustrated, including qualitative research, content/document analysis, survey research, observational research, experimental research, and program evaluation. □ The articles deal

Get Free Journal Article Evaluation

with contemporary topics that will hold your students' attention. □ The lines in each article are sequentially numbered. This allows easy reference to specific parts of the articles during classroom discussions. □ Factual Questions at the end of each article encourage students to read for methodological and substantive points. □ The Answer Key provides answers to the Factual Questions. The line numbers where the answers can be found are included, making the key easy to use. □ The Questions for Discussion at the end of each article address broad issues of research design and overall research quality. □ Ideal for homework assignments followed by classroom discussions at the next class meeting.

'A comprehensive, well-written and beautifully organized book on publishing articles in the humanities and social sciences that will help its readers write forward with a first-rate guide as good company.' - Joan Bolker, author of *Writing Your Dissertation in Fifteen Minutes a Day*

'Humorous, direct, authentic ... a seamless weave of experience, anecdote, and research.' - Kathleen McHugh, professor and director of the UCLA Center for the Study of Women

Wendy Laura Belcher's *Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success* is a revolutionary approach to enabling academic authors to overcome their anxieties and produce the publications that are essential to succeeding in their fields. Each week, readers learn a particular feature of strong articles and work on revising theirs accordingly. At the end of twelve weeks, they send their article to a journal. This invaluable resource is the only guide that focuses
