the past, but none have proved sufficient so far to define a complete understanding of the highly complex processes and outcomes. This book provides the reader with state-of-the-art coverage of the field, essentially forming a roadmap to the field of decision analysis. The first part of the book is devoted to basic concepts and techniques for representing and solving decision problems, ranging from operational research to artificial intelligence. Later chapters provide an extensive overview of the decision-making process under conditions of risk and uncertainty. Finally, there are chapters covering various approaches to multi-criteria decision-making. Each chapter is written by experts in the topic concerned, and contains an extensive bibliography for further reading and reference.

Decision making or making judgments is an essential function in the ordinary life of any individual. Decisions can often be made easily, but sometimes, it can be difficult due to conflict, uncertainty, or ambiguity of the variables required to make the decision. As human beings, we constantly have to decide between different activities such as occupational, recreational, political, economic, etc. These decisions can be transcendental or inconsequential. Analyzing the Role of Cognitive Biases in the Decision-Making Process presents comprehensive research focusing on cognitive shortcuts in the decision-making process. While highlighting topics including jumping to conclusion bias, personality traits, and theoretical models, this book is ideally

Rather than present decision making strictly as a quantitative science, this text views it as a multidimensional process involving values, psychology, sociology, social psychology, and politics. Using a process model—a focus on the process of a decision rather than the outcome—the book presents a variety of perspectives useful for making and evaluating decisions in all kinds of organizations.

Corporations, international crisis and fast breaking events require most people to make decisions on a daily basis without the tools to understand the long term impact that today's decision might create. Because most people have never really been trained in how to make important complex decisions most people rely on experience, and 'gut reaction' which is okay for many decisions, but not okay for decision that will have meaningful impact on organizations and individual. Decision makers need to develop the art and science of strategic decision making. Here, Professor Thomas Martin explains the need for decision makers to modify their thinking about how they deal with acquiring and analyzing information in each of the decision-making process steps. This approach requiring thinking

Modification will lengthen the process, make it more complex, and to some more arduous, but the comprehensiveness of the new thinking approach should lead to improved and more effective decision making. In this book, Dr. Martin presents a thinking modification framework that asserts that in the decision-making process, there are three situational states — a current state, future state, and a transitional state that one must deliberate in finding a solution. For each of these situational states, Martin develops an identical five-step process to determine the best decision to make. The steps of this process include:

- Change-Needing Situational Analysis
- Challenge Framing & Causal Analysis
- Generating Solution Ideas
- Choosing a Solution Set
