Readers gain a solid understanding of Newtonian dynamics and its application to real-world
problems with Pytel/Kiusalaas' ENGINEERING MECHANICS: DYNAMICS, 4E. This edition
clearly introduces critical concepts using learning features that connect real problems and
examples with the fundamentals of engineering mechanics. Readers learn how to effectively
analyze problems before substituting numbers into formulas. This skill prepares readers to
encounter real life problems that do not always fit into standard formulas. The book begins with
the analysis of particle dynamics, before considering the motion of rigid-bodies. The book
discusses in detail the three fundamental methods of problem solution: force-mass-

Drying Hardwood Lumber focuses on common methods for drying lumber of different thickness, with minimal drying defects, for high quality applications. This manual also includes predrying treatments that, when part of an overall quality-oriented drying system, reduce defects and improve drying quality, especially of oak lumber. Special attention is given to drying white wood, such as hard maple and ash, without sticker shadow or other discoloration. Several special drying methods, such as solar drying, are described, and proper techniques for storing dried lumber are discussed. Suggestions are provided for ways to economize on drying costs by reducing drying time and energy demands when feasible. Each chapter is accompanied by a list of references. Some references are cited in the chapter; others are listed as additional sources of information.
