mentioned above and model interpretability tries to understand and explain the steps and decision a machine learning model takes when making predictions. It gives us the ability to question the model 's decision and learn about the following aspects. What features/attributes are important to the model?

Hands-on Machine Learning Model Interpretation | by ...

So regards to interpretation and prediction within supervised machine learning, the majority of our projects will actually

Read Free Machine

call for a balance. So we walk through all those examples and within those examples we thought of, I'd actually want prediction when we were talking about interpretability, and from interpretability, we'd probably want a certain level of prediction.
