This thoroughly updated and expanded edition features two new chapters on statistics for health physics and on environmental radioactivity, particularly concerning radon and radon daughters. Fresh material includes: a derivation of the stopping-power formula for heavy charged particles in the impulse approximation, a detailed discussion of beta-particle track structure and penetration in matter, an extensive description of the various interaction coefficients for photons, several new worked examples and additional end-of-chapter problems.

Following in the wake of Chang's two other best-selling physical chemistry textbooks (Physical Chemistry for the Chemical and Biological Sciences and Physical Chemistry for the Biosciences), this new title introduces laser spectroscopist Jay Thoman (Williams College) as co-author. This comprehensive new text has been extensively revised both in level and scope. Targeted to a mainstream physical chemistry course, this text features extensively revised chapters on quantum mechanics and spectroscopy, many new chapter-ending problems, and updated references, while biological topics have been largely relegated to the previous two textbooks. Other topics added include the law of corresponding states, the Joule-Thomson effect, the meaning of entropy, multiple equilibria and coupled reactions, and chemiluminescence and bioluminescence. One way to gauge the level of this new text is that students who have used it will be well prepared for their GRE exams in the subject. Careful pedagogy and clear writing throughout combine to make this an excellent choice for your physical chemistry course.

* Provides frameworks and methodology for solving problems as technology continues to advance * Starts with the overall business problem, and then shows how technology can solve the problem * Provides an in-depth applied understanding of the technology covered and is targeted to the IT employees who actually build the networks * Business-oriented, problem-solving approach, including real business case studies stressing the business impact of data communications

Pearson introduces yet another textbook from Professor R. C. Hibbeler - Fluid Mechanics in SI Units - which continues the author's commitment to empower students to master the subject.

The devastating attack on Pearl Harbour, the tragic losses, extraordinary courage of the US sailors and airmen, and the fatal decisions of the Japanese are all examined through eye witness accounts and testimony. The terrible repercussions of the attack are explained in full and the story of how Pearl Harbour changed the war not just for America, but for Britain, Germany and the Soviet Union. Red Sun at War is the eagerly awaited sequel to Red Sun Rising, Japan, China and the West.
