PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Smart homes, home automation and ambient-assisted living are terms used to describe technological systems that enrich our living environment and provide means to support care, facilitate well-being and improve comfort. This handbook provides an overview of the domain from the perspective of health care and technology. In Part 1, we set out to describe the demographic changes in society, including ageing and diseases and impairments which lead to the needs for technological solutions. In Part 2, we describe the technological solutions, ranging from sensor-based networks, components, to communication protocols that are used in the design of smart homes. We also deal with biomedical features which can be measured and services that can be delivered to end-users as well as the use of social robots. In Part 3, we present best practices in the field. These best practices mainly focus on existing projects in Europe, the USA and Asia, in which people receive help through dedicated technological solutions being part of the continuum of the home environment and care.

Mobile Python is the introduction of Python programming language to the mobile space. This practical hands-on book

Bookmark File PDF Nokia E62 User Guide

teaches readers how to realize their application ideas on the Symbian OS. Programming on the Symbian mobile platform has been difficult and time consuming in the past. This innovative new title will remedy this problem. Chapters deal with topics that are based on Python S60 features and presented in an order that lets the user learn first the “simple to code” ones and then increasing in complexity.

From its relatively modest debut in 1999, Blackberry has become one of the most popular technological products in the world. Research in Motion – the phenomenally successful company behind Blackberry, which began as a student start-up – has already sold over 75 million smartphones, nearly half of which were sold in the last year alone. This book is a never-before-seen, behind-the-scenes portrait of RIM and its amazing CEOs who are two of today’s most respected businessmen: Jim Balsillie and Mike Lazaridis. It explores in detail not only the company’s early struggles against much larger and much better known firms, but also how RIM has been able to maintain and exceed even its own lofty expectations. With thousands of hours of interviews with people close to the company, including unprecedented access to company founders Jim Balsillie and Mike Lazaridis (they are writing the foreword), award-winning business writer Rod McQueen has crafted an arresting narrative telling this incredible story.
