Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. Writing a Research Paper in Political Science breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, "drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it.

In Writing a Research Paper in Political Science, author Lisa Baglione breaks down the research paper into its constituent parts and shows students precisely how to complete each component. How do we know why the Soviet Union decided to place missiles in Cuba? How do we know why North Korea invaded South Korea? How do we know why the U.S. decided to invade Iraq? We know the answers to these questions because political science scholars did in-depth research and shared their findings. Conducting, presenting, and publishing research are all integral parts of being a political scientist. Students in political science courses are exposed to the research done by scholars. In turn, professors would like their students to become part of this community of scholars and will assign research papers so that students can demonstrate their knowledge of specific topics. An indispensable resource, Research and Writing Guide for Political Science provides a brief primer on the basic skills required for writing an effective research paper. It covers conducting research (finding, evaluating, and using sources); the various parts of a research paper and how they should be organized; writing, rewriting, revising, and editing; and citing the research (footnotes, endnotes, bibliographies, reference lists, and different academic citation styles: MLA, APA, and Chicago). A conclusion offers a list of additional resources.

The SAGE Handbook of Research Methods in Political Science and International Relations offers a comprehensive overview of the field and its research processes through the empirical and research scholarship of leading international authors. The book is structured along the lines of applied research in the discipline: from formulating good research questions and designing a good research project, to various modes of theoretical argumentation, through conceptualization, to empirical measurement and analysis. Each chapter offers new approaches and builds upon existing methods. Through its seven parts, undergraduate and graduate students, researchers and practicing academics, will be guided through the design, methods and analysis of issues in Political Science and International Relations discipline: Part One: Formulating Good Research Questions and Designing Good Research Projects Part Two: Methods of Theoretical Argumentation Part Three: Conceptualization & Measurement Part Four: Large-Scale Data Collection & Representation Methods Part Five: Quantitative-Empirical Methods Part Six: Qualitative & "Mixed" Methods Part Seven: EITM & EMTI
