Dissecting tools will be used to open the body cavity of the rat and observe the structures. Keep in mind that dissecting does not mean "to cut up"; in fact, it means, "to expose to view". Careful dissecting techniques will be needed to observe all the structures and their connections to other structures. You will not need to use a scalpel.

This dissection manual is an outgrowth of what Waldemar Schmidt has called the ‘ ‘ oral tradition ’ ’ of surgical pathology. Traditionally, the senior pathologist passed down to the trainee an individual accumulation of expertise on the handling of specimens. This transfer of information was often random and based solely on the specific case at hand. Now, despite the importance of training ...
