A genuine evidence-based text for optimum pain relief in various chronic conditions  
Contributes an important advance in the practice of pain management providing the information on which to build more coherent and standardised strategies for relief of patient suffering  
Answers questions about which are the most effective methods, AND those which are not effective yet continue to be used  
Includes discussion of the positive and the negative evidence, and addresses the grey areas where evidence is ambivalent  
Written by the world's leading experts in evidence-based pain management this is a seminal text in the

Newly appointed police inspector Domenic Jejeune doesn't mind ruffling a few feathers to flush out suspects in the brutal murder of a renowned ecological activist. 2015 Arthur Ellis Award ☐ Winner, Best First Novel ☐ Globe and Mail 100: Best Books of 2014 ☐ 2015 Kobo Emerging Writer Prize ☐ Shortlisted, Best Mystery Inspector Domenic Jejeune's success has made him a poster boy for the U.K. police service. The problem is Jejeune doesn't really want to be a detective at all; he much prefers watching birds. Recently reassigned to the small Norfolk town of Saltmarsh, located in the heart of Britain's premier birding country, Jejeune's two worlds collide when he investigates the grisly murder of a prominent ecological activist. His ambitious police superintendent foresees a

To unravel this mystery, Jejeune must deal with unwelcome public acclaim, the mistrust of colleagues, and his own insecurities. In the case of the Saltmarsh birder murders, the victims may not be the only casualties.

With fuel costs and parking charges it's no wonder the consumer is looking for less expensive forms of travel. This book is aimed at the rider who wants to do his or her own basic scooter maintenance and servicing without the need for in-depth mechanical knowledge, or a technical manual. It covers areas such as oil, brakes, tyres, transmission, electrics, etc, allowing the owner to address the most regularly serviced items without forking out for

253 additional costs. Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

Medical abortion care encompasses the management of various clinical conditions including spontaneous and induced abortion (both viable and non-viable pregnancies), incomplete abortion and intrauterine fetal demise, as well as post-abortion contraception. Medical management of abortion generally involves either a combination regimen of mifepristone and misoprostol or a misoprostol-only regimen. Medical abortion care plays a crucial role in providing access to safe, effective and acceptable abortion care. In both high- and low-resource settings, the use of medical methods of abortion have contributed to

250 task shifting and sharing and more efficient use of resources. Moreover, many interventions in medical abortion care, particularly those in early pregnancy, can now be provided at the primary-care level and on an outpatient basis, which further increases access to care. Medical abortion care reduces the need for skilled surgical abortion providers and offers a non-invasive and highly acceptable option to pregnant individuals.

This is an open access book. Lewis F Richardson (1918-1993), a physicist by training, was a pioneer in meteorology and peace research and remains a towering presence in both fields. This edited volume reviews his work and assesses its influence in the social sciences, notably his work on arms races and their consequences, mathematical models, the size distribution of wars, and geographical features of

250 conflict. It contains brief bibliographies of his main publications and of articles and books written about Richardson and his work and discusses his continuing influence in peace research and international relations as well as his attitude to the ethical responsibilities of a scientist. It will be of interest to a wide range of scholars. This book includes 11 chapters written by Nils Petter Gleditsch, Dina A Zinnes, Ron Smith, Paul F Diehl, Kelly Kadera, Mark Crescenzi, Michael D Ward, Kristian Skrede Gleditsch, Nils B Weidmann, Jürgen Scheffran, Niall MacKay, Aaron Clauset, Michael Spagat and Stijn van Weezel. Lewis F Richardson occupied an important position in two academic fields as different as meteorology and peace research, with academic prizes awarded in both disciplines. In peace research, he pioneered the use of mathematical models

and the meticulous compilation of databases for empirical research. As a quaker and pacifist, he refused to work in preparations for war, paid a heavy prize in terms of his career, and (at least in the social sciences) was fully recognized as a pioneering scholar only posthumously with the publication of two major books. Lewis Fry Richardson is one of the 20th century's greatest but least appreciated thinkers—a creative physicist, psychologist, meteorologist, applied mathematician, historian, pacifist, statistician, and witty stylist. If you've heard of weather prediction, chaos, fractals, cliometrics, peace science, big data, thick tails, or black swans, then you have benefited from Richardson's prescience in bringing unruly phenomena into the ambit of scientific understanding. Richardson's ideas continue to be relevant today, and this collection is a superb retrospective on

At a UN General Assembly Special Session in 1999, governments recognised unsafe abortion as a major public health concern, and pledged their commitment to reduce the need for abortion through expanded and improved family planning services, as well as ensure abortion services should be safe and accessible. This technical and policy guidance provides a comprehensive overview of the many actions that can be taken in health systems to ensure that women have access to good quality abortion services as allowed by law.
