Accounting: Text & Cases is a product of lifelong dedication to the discipline of accounting. Covering both financial and managerial accounting as well as broader managerial issues, the book incorporates a breadth of experience that is sure to enrich your course and your students. The approximately 109 cases that make up most of the end of chapter material are combination of classic Harvard style cases and extended problems, with 12 complete new cases added to the 13th edition. The text is covered as two parts. Part 1 deals with chapters 1 -14 which cover financial accounting, while part 2 covers Chapters 15-28 which in essence is associated with management accounting. The tale end of part 2 also focuses on broader issues of control and corporate strategy. Both parts have been updated to reflect the current changes relevant to Accounting.

The overriding philosophy of this text is to provide the instructor with comprehensive coverage of ethical and professional issues encountered by accounting professionals. The book is devoted to helping students cultivate the ethical commitment needed to ensure that their work meets the highest standards of integrity, independence, and objectivity. Ethical Obligations and Decision Making in Accounting is designed to provide the instructor with the best flexibility and pedagogical effectiveness of any book on the market. To that end, it includes numerous features designed to make both learning and teaching easier.

This book discusses various aspects of cost accounting ¶ cost ascertainment, cost analysis, and managerial decision making ¶ in a logical and comprehensive manner. The new edition provides lots of Indian cases and excel templates to solve the problems and illustrations. Salient Features: New 19 Indian cases Excel templates to provide solution to the numerical problems at the end of each chapter Text and chapter end problems are thoroughly revised to meet the requirements of students in both PG and UG level courses

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

The approach used by Thibodeau and Freier emphasizes the substantial benefits of using real-life case examples in helping to impart knowledge related to the practice of auditing. This type of approach has long been acknowledged as a superior manner in which to teach. Since the authors present the concepts of auditing using actual corporate contexts, they seek to provided students with a real-life appreciation of these issues and clearly demonstrate the value of the Sarbanes-Oxley Act of 2002 and the post-Sarbanes technical audit guidance. The Third Edition has been updated to reflect all of the major changes happening in today¶s society with actual companies such as Enron, WorldCom, Qwest, Sunbeam, that have become synonymous with the capital markets¶ crisis in confidence. With 45 different short cases, instructors can assign 8 to 9 different cases for each of four different semesters.

This management accounting text for undergraduates details real life scenarios of decision making and problem solving in large and small organizations from both the manufacturing and service sectors. There is also appropriate emphasis on non-accounting inf
