Hopkinson Kolsky Bar  
Design

The Hopkinson  
pressure bar was first  
suggested by Bertram  
Hopkinson in 1914  
as a way to measure  
stress pulse

propagation in a  
metal bar. Later, in  
1949 Herbert Kolsky  
refined Hopkinson's  
technique by using  
two Hopkinson bars

A Split Hopkinson  
Pressure Bar (SHPB) /  
Kolsky Bar is used to  
test the high strain  
rate material  
properties of  
materials. The  
Hopkinson bar is

# Read Online Split Hopkinson

used to impose a dynamic load on a material specimen akin to that which the material will experience in dynamic situations like vehicle crashes or other high-energy events.
