Opening Topics Lists define the topics you'll need to learn in each chapter, with numbering linked directly to official exam objectives Concise Tables and Figures bring together knowledge in an easy-to-use format Exam Tips call attention to the information that's most crucial to know for the exam Notes provide deeper context and links to additional information Key Terms definitions and a complete glossary explain all of the field's essential terminology HIT in the Real World stories link concepts to real HIT work environments Chapter Summaries help you quickly review every key topic Acronym Drills reinforce learning of important acronyms Review Quizzes help you gauge your knowledge; all answers are provided and explained at the end of the book Practical Application critical thinking questions deepen your understanding Well-regarded for its level of detail, assessment features, and challenging review questions and exercises, this CompTIA authorized study guide helps you master the concepts and techniques that will enable you to succeed on the exam the first time.

Fortify Your Data is a book written to help educate business leaders on how to keep both their own and their customer's data protected. It is extremely important to know not only how Blockchain, IoT, and Artificial Intelligence can affect your business, but how to properly secure these new technologies so that they don't backfire. Fortify Your Data's mission is to help educate everyone who uses technology on the emerging technologies and best practices. We plan to stock this website with the results of research in several technology topics such as the Internet of Things, Blockchain, Artificial Intelligence, Virtual Reality, Cyber security, and everything else that is emerging and relevant to the technology scene. The author, Michael Hudak, is a tech leader out of Cleveland, Ohio with a wealth of knowledge to share on technology - with over a decade's experience in all things tech from BlockChain and IoT to general routing/switching and cloud implementation. Today, Michael works as part of an extremely accomplished team at BlueBridge Networks, a world class SSAE 16 SOC Third party audited and HIPAA HITECH assurance data center & PCI best practice company offering secure and compliant Data Center Services, Cloud Computing and Managed Services and IT Security. BlueBridge Networks has an institutional mission of being an educator and innovator in the mid-west technology market, with several solutions centered around protecting your data.

Network Routing: Fundamentals, Applications and Emerging Technologies serves as single point of reference for both advanced undergraduate and graduate students studying network routing, covering both the fundamental and more moderately advanced concepts of routing in traditional data networks such as the Internet, and emerging routing concepts currently being researched and developed, such as cellular networks, wireless ad hoc networks, sensor networks, and low power networks.
