the lateen became the favorite sail of the Age of Discovery, mainly because it allows a boat to tack "against the wind". It is common in the Mediterranean and the northwestern parts of the ...

~~Lateen~~ — ~~Wikipedia~~

The Gaff is the spar from which a four cornered sail is hung. This allows a fore and aft sail of a larger area, than that of a Bermudan sailing rig, to be hung from a mast of similar height. The advantage is the large area of sail high up, however the extra weight aloft brings its own complications.

The rig. The luff of the sail is bound to the mast, but unlike the gaff rig where the head is bound to a spar, this rig supports the leech of the sail by means of a diagonal spar or spars named a sprit (/ s p r i ? t /). The forward end of the sprit spar is attached to the mast, with the after end of the sprit spar attached to the peak. The sprit is steadied and controlled from the deck by a ...

or capsize than a comparable sloop, and has more flexibility in sail plan when reducing sail under strong crosswind conditions—the mainsail can be brought down entirely (not requiring reefing) and the remaining rig will be both balanced on the helm and capable of driving the boat. The ketch is a classic small cargo boat.

~~Sail plan — Wikipedia~~

Fortunately, rig tuning is a straightforward step by step process for both masthead and fractional rigs. The goals in rig tuning are the following: (1) Eliminate side bend and lean, (2) Set

A Bermuda rig, Bermudian rig, or Marconi rig is a configuration of mast and rigging for a type of sailboat and is the typical configuration for most modern sailboats. This configuration was developed in Bermuda in the 17th century; the term Marconi, a reference to the inventor of the radio, Guglielmo Marconi, became associated with this configuration in

the early 20th century because the wires that stabilize the mast of a Bermuda rig reminded observers of the wires on early radio masts.

~~Bermuda rig — Wikipedia~~

A gaff rig employs a spar on the top of the sail and typically other sails can be set in conjunction with that mainsail with the gaff.

Often, on the smaller, non tall ship, gaff rigs, there will be a small triangular sail that fits between the main and the mast like a puzzle piece - this is the topsail.

## ~~Rig~~ — ~~American Sailing Association~~

The junk rig, also known as the Chinese lugsail or sampan rig, is a type of sail rig in which rigid members, called battens, span the full width of the sail and extend the sail forward of the mast. While relatively uncommon in use among modern production sailboats, the rig's potential advantages of easier use and lower cost for blue-water cruisers have been explored by individuals such as trans-Atlantic racer Herbert "Blondie" Hasler and author Annie Hill.

By taking off the part of the sail and yard, in front of the mast, and letting the remaining part of the yard, rest with a yaw to the mast, the gaff rig was created. It can be used in ships of any size. Examples of ships with one mast, two masts, three masts... until the largest one, even rigged with seven masts are seen.

bend when powered up to open the slot between the leech and mainsail luff to keep steady helm balance.

~~BG Sails and Design IOM Sail and Rig Tuning Guide Mast Rake~~

Tuning your rig - left adding turns, right measuring the tension using a vernier guage. To check the adjustment of your rig start by sailing close-hauled with the boat nicely powered up at around 20 degrees of heel - ideally with full sail in flat water and around 10-14 knots of wind, depending on the vessel.
