The demand for environmental goods can be revealed by examining the purchases of related goods in the private market place. There may be complementary goods or other factor inputs in the household ' s production function. There are a number of revealed preference methods such as travel- cost method, hedonic price method and property value method.

Valuing environmental goods : an assessment of the ...

The practice of putting a price tag on environmental natural resources is not without its limitations. The first of these relates to accuracy: considering the complex, non-linear nature of ecosystems, valuing the worth of their non-marketed goods can be an imprecise exercise. This uncertainty needs to be
